2000 Audi A4

there is no reason for an intake on this car. no aftermarket intake is true cold air, even the 300+ dollar carbonio. best thing is a k&n drop in filter for 50 bux. there are simply 0 gains from a CAI. APR nuthuggers, say what you want, but there are literally hundreds of dyno's proving no gains or even losses when changing from the stock airbox.

Heater blowing cold air in my audi a4 1.8t? ... The heater blowing cold air can be caused by two different types of problems. One, the leaking coolant and the lesser amount of coolant in the system reduces heat output. Two, the engine is not getting hot enough to generate heat.

Heater blowing cold air in my audi a4 1.8t? | Yahoo Answers

I've just been done over after buying a 2004 Audi A4 Avant tdi sport from private seller. Not realising because i test drove the car whilst cold that the blowers would blow cold air unless going up hill then it would warm up. As soon as i levelled up or went down hill the temperature would drop.

A4 Heater blows cold unless the car is driven or ... - Audi

the air coming out should definitely be cold and refrigerated with the aircon on right? not like the 18C the guy said it would do cause its climate control? on their first go last week they removed 0.350kg and recharged with 0.775kg, today they removed 0.510kg and added 0.750kg again, so obviously some is going somewhere but even when i first got it back it didn't seem any colder
