Ok, here's why the fuse blew. When the stupid kid from AAA showed up with the jumper pack he reversed the polarity on the battery. Put the jumper cables pos on neg, neg on pos. Huge blue spark happened. I'll bet that's when the fuse blew. Called AAA today to file a claim. The tow co has 24 hours to respond. Edited April 18, 2017 by bob\_G

After a battery reset of the radio, my CD changer is no longer recognized by the radio in my 98 TDI bug. Also, the magazine will not eject from the player - acts as if it is dead. Is there a fuse to check on this puppy (did not see one in the regular fuse box), or is it a lost cause requiring replacement? Anyone have any experience on this?

### CD changer not functioning - fuse? - TDIClub Forums

Q. My CD Changer is jammed and will not eject. A. Before thinking of repair, disconnect the CD changer. Wait several minutes then reconnect. This may act as a "Reset" and bring the CD changer back to life. In some cases, disconnecting one of the battery terminals for several minutes may be easier.

### My 6 CD changer is jammed and will not eject... | Mercedes ...

There is no fuse for CD changer. There's a fuse for everything else, including things I don't have, such as convertible top. There are two fuses for the radio, both okay, but no fuse for the changer. Check the back of the changer.

Has anyone else with the factory CD changer experienced the situation where the CD changer stops playing, the CD disc icon (to the left of the list of loaded disc numbers) starts flashing, and the display changes to "INITIALIZING"? This just happened today for the second time on our '06, and we've never experienced it with our '05.

Which model radio; the single CD player or the one with the 6-CD changer/player? "Radio not working" meaning nothing at all on the display, and no sound out of the speakers? Or is it just no sound out of the speakers? (Noting that " a CD ejected from radio" when the fuses were replaced so there was some power to the radio.)
