Manual focus lenses | The GetDPI Photography Forum

Lens wide open less sharp than later post-war lenses, pleasant soft what was requirement from a portrait lens in those years when this lens launched. Stopped down to F2 at least or even better more , stunning performet with swirly bokeh. Lens has simple construction , focusing very smooth , light weight , diameter is not huge so pleasant to use.

Manual Focus Lenses Carl Zeiss Jena Konica Hexanon

With a non-CPU lens mounted on your D3300 you will need to set the aperture ring on the lens to f/22. You will need to shoot in Manual exposure mode and of course you'll need to focus manually. You will control exposure using the Exposure Compensation button and/or Command Wheel on the D3300,

How do you use OLD Manual Focus Nikon Lenses on the D3300?

In the manual focus lens realm, and those who typically shoot with them, the meaning of optical quality is quite different. On this forum, it seems most qualify quality from pixel peeping, DxO metric obsessed, and having the most sterilized, almost lab perfection output, as a definition of "the best quality."

List of Manual Focus lenses? - Nikon Rumors Forum

Manual focus lens structure and build are much less complicated than autofocus lenses. The higher quality older lenses are sturdy and robust. There are three main things to look out for in second-hand lenses: Indications that they have been dropped or otherwise mistreated. Dings and heavy scratches on a lens are not a good sign.

Diversify Your Gear Options With Old, Manual Focus Lenses

> If I put an older manual lens on a Nikon D70, will the in-focus > indicator (inside the viewfinder) still come on when the subject is in > focus? Generally, yes. Possibly with a slow enough lens it won't; but the manual lenses I use on my Fuji S2 (same rules on which lenses meter and all, though) are the *fast* ones, so I haven't tested that. --

manual lenses on D70 | Tom's Guide Forum

It autofocuses manual focus lenses simply by moving them forward and backward, giving any lens you can mount on it the ability to autofocus, and maintaining the use of the camera's built-in image ...

Top comment " This lens does amazing with photos upgraded form the manual focus...This lens is awesome for closeup, I m beginners so I need little time like 20-30 sec to focus lens correctly to take photo, if you are planning out door trip like going NY or DC to day trip this lens might not be good fit as this is good fit for closeup and portrait" "This lens does amazing with photos upgraded ...

Manual Focus Lenses - Best Buy

I spent some time swopping a manual focus lens back and forth between an XPro2 and an XT2 in the shop the other day. For this test I used my old Fujinon 55mm f/1.8 lens in M-42 mount. I know about the various differences between the features on these two cameras, but the deciding factor for me will be performance with manual focus lenses.

X-Pro2 vs X-T2, with adapted manual focus lenses. | Fuji
