Transportation economics - Transportation economics - Transportation regulation and deregulation: For many years, the economic practices of much of the transportation system in the United States were regulated. Today, interstate pipeline and some interstate railroad traffic is regulated, as is intrastate motor carriage in most states. At one time, nearly all intercity transportation was ...

Transportation economics - Transportation regulation and ...

Cabotage is the transport of goods or passengers between two places in the same country by a transport operator from another country. It originally applied to shipping along coastal routes, port to port, but now applies to aviation, railways, and road transport as well. Cabotage rights are the right of a company from one country to trade in another country. In aviation, it is the right to operate within the domestic borders of another country. Most countries do not permit aviation ...
